

QUICK TIP!

Hey Kids! Time for a super
fun math lesson, courtesy of
Math Madness!

SUBTRACTING WHOLE NUMBERS

- Subtract the numbers column by column, going from right to left.
- If a column has a smaller number on top, you will need to "borrow" from the column to the left.
- To do this, cross out the number to the left and replace it with its value minus one.
- Then, cross out the number in the column you are currently working on and replace it with its value plus 10.
