

HASTUR FARMS

Hooray! It's almost Halloween! Time to pick a pumpkin at Hastur Farms. It's the scariest farm for miles around!

You know how some farms have fun activities like a petting zoo? Hastur Farms has one too, only better. All of the animals have tentacles growing out of their backs! The chickens have a single tentacle, the goats have 3, and the goldfish has 725. There are 12 chickens, 3 goats, and 1 fish. How many tentacles are there in total?

Hastur farms has a corn maze. It is said to harbor secrets that man was not meant to know! The twists and turns of the maze branch out in ways that defy human understanding. Of those that enter, only one-third leave. The rest disappear with nothing more than an echoing moan or the faint sounds of distant, mocking laughter. Of the 75 guests who entered today, how many will exit, haunted forever by their glimpse into the howling infinity of the void?

Most places charge you based on how much your pumpkins weigh. At Hastur Farms, they charge you based on how many eyeballs your pumpkins have! It may sound a bit strange for pumpkins to have eyeballs, but that is what makes Hastur Farms the best. Sometimes they even blink! Darla has a pumpkin with 3 eyes, Cecily chose 6 with six and Jimmy Maddox has one with 4. It is 2 dollars per eyeball, and dad has 100 dollars to spend. How much money will be left over after Dad buys the pumpkins?

Dad decides to spend 36 dollars to buy some corn. The kids take turns feeding it to the cows. The cows' heads kind of turn inside out, and a long tongue shoots out to grab the corn. It's neat, but you don't want to get too close! The cost this year is 4 dollars per ear of corn. How many can dad buy? How many will each of the 3 kids get if they divide them up evenly?
