QUICK TIP!

Hey Kids! Time for a super fun math lesson, courtesy of Math Madness!

## — REMAINDERS AS FRACTIONS —

When you are dividing, you can express your remainder as a fraction. Sometimes, an answer makes more sense when you write it as a mixed fraction... it depends on the question!
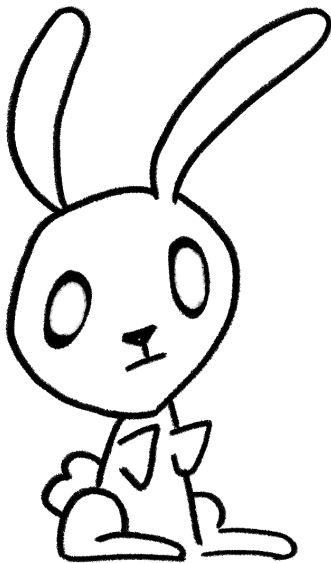

For example:

$$22 \div 7 = 3\,r\,1 = 3\frac{1}{7}$$

$$18 \div 5 = 3\,r\,3 = 3\frac{3}{5}$$

TRY IT! —

Write any remainders as fractions.

$8\overline{)52}$ $22\overline{)614}$ $12\overline{)125}$

$30\overline{)305}$ $3\overline{)316}$ $9\overline{)281}$

$5\overline{)24}$ $10\overline{)51}$ $11\overline{)422}$
