

JOBY BIGGLY IN THE BIG SANDWICH

It's always good to put a lot of meat on a sandwich. Joby piles on 400 grams of ham. Next, he adds 315 grams of turkey. He then adds 227 grams of beef and 360 grams of chicken. How many grams of meat are on the sandwich?

Would YOU put a whole jar of pickles on a sandwich? Neither would Joby. He uses 3 jars! A jar comes with 24 pickles in it. Joby puts most of them on his sandwich, but leaves 5 in one jar in case someone else wants some. How many pickles did Joby put on his sandwich?

Joby put 25 slices of cheese on his sandwich. While he has his back turned, a mouse eats $\frac{1}{3}$ of them. How many slices of cheese did the mouse eat? How many are left? Express your answer as a mixed fraction.

What about mustard? I'm glad you asked! Joby puts 2 jars of mustard on the sandwich. Then he puts an extra $\frac{1}{2}$ jar on just for good measure. Each jar has 16 ounces of mustard. How many ounces of mustard did Joby put on the sandwich?

Ahh... the sandwich is ready. It is time to feast! The sandwich weighs 21 pounds and Joby can eat about $\frac{3}{4}$ pounds per minute. How many minutes will it take him to finish it all?

Would YOU enjoy eating a BIG sandwich?
