

QUICK TIP!

Hey Kids! Time for a super fun math lesson, courtesy of Math Madness!

REMAINDERS AS DECIMALS

Just as you can write remainders as fractions, you can also write remainders as decimals.

Just keep dropping down zeros once you hit the end of the dividend. Use a decimal point in your answer to indicate when this begins.

$$4 \overline{)15} \rightarrow 4 \overline{)15} \frac{3}{3} \rightarrow 4 \overline{)15} \frac{3.7}{2} \rightarrow 4 \overline{)15} \frac{3.75}{0}$$

TRY IT!

$$20 \overline{)344}$$

$$2 \overline{)59}$$

$$4 \overline{)51}$$

$$8 \overline{)390}$$

$$60 \overline{)72}$$

$$12 \overline{)3}$$

$$2 \overline{)1}$$

$$20 \overline{)167}$$

$$5 \overline{)13}$$
