

QUICK TIP!

Hey Kids! Time for a super
fun math lesson, courtesy of
Math Madness!

MULTIPLYING WHOLE NUMBERS

- Take the digit on the bottom and multiply it against each digit of the top number, moving from right to left.
- Write the ones part of the result below the digit as part of your answer.
- Write the tens part (if there is one) above the next digit to the left.
- When you move on to the next digit of the top number, add the carried over value after doing the multiplication.

$$\begin{array}{r} 2535 \\ \times 6 \\ \hline \end{array} \rightarrow \begin{array}{r} ^3 2535 \\ \times 6 \\ \hline 0 \end{array} \rightarrow \begin{array}{r} ^2 2535 \\ \times 6 \\ \hline 10 \end{array} \rightarrow \begin{array}{r} ^3 ^3 2535 \\ \times 6 \\ \hline 210 \end{array} \rightarrow \begin{array}{r} ^3 ^3 2535 \\ \times 6 \\ \hline 15210 \end{array}$$
